DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 1,

-line 5, "ends" has been changed to -end--;

-line 6, "circuits" has been changed to -circuit--.

In the Drawings,

Figs. 1 and 2 have been labeled as -PRIOR ART--.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose an active type of display panel wherein each of the plurality of pixel portions has a switch device for electrically connecting between the other end of the series circuit and the first power line, and electrically connecting between the other end of the series circuit and the second power line of a corresponding group of the plurality of pixel portions (claim 1) and a display device and method for driving said active type of display panel having, inter alia, a display controller which has a drive current detector which detects the drive current in the scanning period and a data correcting device which corrects the data signal held in the holding device such that the drive current

detected in the scanning period becomes equal to a current level corresponding to a light-emitting luminance represented by the data signal (claims 4 and 8). The remaining claims 2, 3 and 5-7 are allowed by virtue of their dependencies on the independent claims 1 and 4. Hence, the examiner has allowed claims 1 through 8.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hashimoto, Patent No. 6,633,270; Winters, Patent No. 6,771,028; Bae et al., Patent No. 6,380,688; Yokoyama, Patent No. 6,281,634; Yumoto, Patent No. 6,686,699; Ishizuchi et al., Pub. No. 2003/0122813.

None of the above documents discloses the pixel portion arrangement and the display controller as recited.
